

IMAGE NAVIGATOR

by Immuno Concepts

The Fully Automated Solution for
HEp-2 and HEp-2000® ANA Screening

Simple 3-Step Process

1. Place up to 4 ANA slides or 84 wells onto the automated stage
2. Initiate reading with the Immuno Concepts Navigator software and walk away
3. Review both positive and negative *sorted* results on the large computer display

IMAG-NAVIGATOR

Benefits YOUR Laboratory TODAY!

- Fast** Automated image acquisition of up to 84 wells per run and 4 images per well
- Easy** Review negative images via Thumbnail Display
- Time Saving** Sorts images into positive / negative determinations
- Permanent Record** Stores the images in Sample and Patient Management Software
- Comfortable** Displays images on a monitor for review
- Convenient** Provides single-click magnification
- Compliant** FDA and CE compliant security algorithms and barcode processing
- Efficient Workflow** Allows the technologist to select pattern information and enter comments for each sample

No darkroom is required to read results
No expensive illumination system is needed
Software sorts images into positive and negative folders for review
